The world's best photocopier, from the world's most modest dealer.

It's difficult to remain calm about the new Minolta EP450 Zoom copier.

Which other copier can take a dozen different sized originals and turn out a dozen copies of a standard size at the touch of a button?

Who else lets you programme into the memory of a photocopier your own reduction/enlargement requirements?

And where else will you find a dealer who knows what he's selling inside out?

For the answer to all these questions, contact:
